- ✓ Trees will be sold on a first come first serve bases.
- ✓ Trees usually arrive mid-April. We will send out a post card or e-mail notifying you of pick-up dates.
- ✓ Call our office to check on tree availability. (507) 724-5261 ext. 3
- ✓ We purchase good stock, but make no survival guarantee.
- ✓ Payment is due in full with order. Make checks payable to: Houston County Treasurer

Mail to: Root River SWCD  
805 N. Hwy. 44/76, Suite 1  
Caledonia, MN 55921

Phone: (507) 724-5261 Ext. 3

### CONIFERS - TRANSPLANTS

Variety	Size	Maturity Size	Description
Pine, Norway (Red Pine)	9" – 24"	75 - 100'	Needles are 4 – 6" long, flexible, and a dark yellow-green color. Prefers well-drained, moist soils, but will tolerate dry conditions. Prefers full to partial sun. Growth spread ranges from 50-75'. Fast growth rate.
Pine, White	9" – 16"	75 - 100'	Needles are 3-5" long, very soft and flexible, and a bluish-green color. Grows well in rich, moist soil, but does best in moist, sandy loams. Full sun to partial shade. Growth spread ranges from 50-75'. Fast growth rate. Soft, picturesque tree. Good lumber tree.
Spruce, Colorado	12" – 18"	70 - 100'	1" – 1 ½" needle all shades of blue and green with very sharp tips. Prefers well-drained, moist soils but will tolerate dry conditions. Moderately tolerant of shade. Provides a 20-35' growth spread. Medium growth rate.
Spruce, Norway	7" – 15"	40 - 100'	Full sun and drought tolerant 20-50' growth spread. Does well in dry, moist or wet conditions. Fastest growing spruce. Dense draping branches. Needles are ½ to 1" long. Not native.
Spruce, White	9" - 16"	50 - 80'	Needles are 1/3 – 3/4" long. Tolerant of shade. Does best in moist, well-drained, gravelly soils. Drought sensitive. Good wildlife cover and useful windbreak tree. Medium growth rate.
Fir, Balsam	8" – 12"	50 - 75'	Shade tolerant with 20-30' growth spread. Prefers moist, wet regime. Sensitive to drought. Bears small cones. Slow growth rate.

### DECIDUOUS TREES

Variety	Size	Maturity Size	Description
Maple, Sugar	12" – 18"	50 - 75'	Brilliant orange red fall color. Tolerates shade. Thrives on fertile moist and well drained soils. Collect sap in the spring for your own maple syrup. Valuable for wood products and excellent firewood. Slow growth rate.
Oak, Red	6" - 18"	60 - 80'	Fastest growing Oak. Does best on moist or well-drained sites in full to partial sun. Valuable wood products tree. Acorns provide excellent wildlife food source. Fall color is red to a winter bronze.
Oak, White	6" – 18"	75 - 100'	Does best on slightly moist to well-drained sites. Full to partial sun. Acorns provide excellent wildlife food source. Brown, purple autumn foliage. May hold some leaves over winter. Excellent firewood & valuable wood products tree. Slow growth rate.
Walnut, Black	8" – 18"	70 - 100'	A large tree with medium green, compound leaves. Does best on rich, deep, fertile, well-drained soils. Requires full sun. Widely planted and highly regarded for top quality lumber. Excellent food source for wildlife. Yellow fall color. Rapid growth rate.

### SHRUBS

Variety	Size	Maturity Size	Description
Nannyberry	12" – 18"	15 – 18'	Upright shrub with growth width 6 – 10'. Full sun, partial sun or shade; sandy loam to silty clay loam. White spring flower turning to drupe, black fall fruit. Drought tolerant. High wildlife rating. Medium growth rate.
Crabapple, Red Splendor	12" – 18"	20 - 25'	Full sun with sandy loam to clay loam soil texture. Should have moderate drainage with dry, moist or wet moisture regime. Growth width 20'. Pink spring flower precedes red fruit from spring through winter. High wildlife rating. Fast growth rate.
Cranberry	12" – 18"	8 - 12'	Attractive, tall, upright shrub with 8-12' spread. White spring flower followed by red fall & winter berries. Soil texture from sandy loam to clay. Drainage from poor to moderate and drought tolerant. Full sun to shade. Excellent wildlife food and cover.
Dogwood, Red Osier	12" – 18"	6 - 12'	Attractive red stems with white flowers followed by white berries. Growth spread of 6-12'. Red twigs create winter color. Tolerates almost any location, growing in moist soils and full sun. Effective bank cover holds soil well. Excellent wildlife food source and cover. Fast growth rate.
Lilac, Common Purple	18" – 24"	10 - 15'	Delicate, fragrant, purple flowers in May. Perfect for border, screens or windbreaks. Hardy with 6 – 12' growth spread. Prefers rich, well-drained sites and requires full sun. Good for wildlife cover. Not native. Medium growth rate.
Plum, American	12" - 18"	10 - 30'	Small tree with an 8 – 25' spread that produces fragrant white flowers in early spring. Bears 1" red which can be used for jellies. Excellent for wildlife food and habitat. Requires well drained soil and a sunny location. Quite drought tolerant.

### HOW MANY TREES DO I NEED & HOW FAR APART DO I NEED TO PLANT THEM?

*Windbreaks/Shelterbelts* - Shrubs: 6 ft. apart in rows, Trees: 15 ft. apart in rows (Rows should be 15 – 20 ft. apart)

*Wildlife Planting* - Mixed plantings of shrubs & trees average 10 ft. apart in rows and between rows (about 500 seedlings per acre).

*Fiber Production* - Average spacing of 8 ft. apart in rows and nine feet between rows (about 700 seedlings per acre).
